<u>YEAR</u>	<u>VOLUME (cubic feet)</u>

1973	600
1974	600
1975	600
1976	1,449
1977	634

1980	424
	<u>5,755</u>

5. Based upon the data in paragraphs 2, 3, and 4, the estimated Agency Archives and Records Center film accessions are projected as 11,087 cubic feet by the year 1980. These estimates result from community established collection programs which in turn show an intensity of activity peaking in 1973-1974. A decrease in programming is projected for 1975 resulting in a lower but constant level of film production. It is also pointed out, the film to be retired to the Agency Archives and Records Center within the above time frames consists of original negatives operational in content with extraneous and non-intelligence material having been removed. These estimates also include a 3-year retention period in NPIC before retirement to the Agency Archives and Records Center.
